"The south has se apologies to make and nothing to take back."

The president was amily equal to the occasion. He replied: "We had something to take back." We took you back. We were glad to take you back, and you were glad to take you back, and you were glad to have us take you back."

In his private life Mr. McKinley practices the virtue of democratic simplicity. He likes to five countortably, but his ideas of comfort are ou a line with those of the ordinary well to doctitisen. His home in Canion is au #x-ample of this. It is a modest dwelling, which does not aven suggest a mansion.' Although it was the house, in which the president and Mrs. McKinley first legan househoolog, Mr. McKinley first legan househoolog, it to sampaign of 180d.

Mr. McKinley has led such a busy life that he hen never had time to acquise a taste for any but simple recreations. The candidate for re-election to the highest office in the gift of the people is today a man who migh! well be taken as a typical Americau. He is rather bloot, but nose too much so for his height and age. His is not the commanding figure of Lincoln's, nor is it necking is inches, as was Grant's. Men who knew Stephen A. Douglos say thei Mr. McKiuley resembles him very muck.

thei Mr. McKinley resembles him very muck.

Mr. McKinley looks practically no older now than he did when he was nominated for the first lime. Four years of presidential responsibility may have thissed somewhet the hair on his forchead and touched if with white on the temples, but the lines about he mouth and eyes seem no deeper. In spits of as a ventrul administration it is probable that the gain of self condence and mental pokes has more then made up for the strain of hard work and the anxiety about external things.

Men who finally reach a successful

slowly. It appears to be this way with
Mr. McKinley. Some of his friends

Mr. Bryan's address of acceptance it ladimapolis should be read by every voice whether he intends to imprort Mr. Bryan with his rote or not. As a piece Bryan with his vote or not. As a piece of compalga literature II ranks with the very best. A careful perunal of it cannot but call to miant those great speeches of the past of Lincoln, Clay and other carnest patriots. It is falensely carnest, dignified and of the lighest order of shillty. We doubt if its equal will be profined by any one clase in this camping on either side, and it would be difficult for roce Mr. Bryan hispelf to surpass this great effort. Those who do not read it will miss a mental trent. To enforce our opinion of this speech we quote from an eithorial in the Boston strending fagst yeening:

The impression is get extraored and statement of something relector—that he is mill the "Hoy tirator," as he was called in the early years of his suprisdice. To apply may such characterization to the anthor of this address will be recognised as sholly impropriete. The Herald, as he well enough known by this time, dives not take the same view of the subject discussed that is held by Mr. Bryan, and dues not support his candidacy. But to any of this address that it tacks the similar of the subject the internace of a robust, carnest competent disputant our feeling is the internace of a robust, carnest ecompetent disputant our feeling is that his speech will give Bryan kighev rank monog the stressment of the mation than he has had before.

"The significance of the speech to the teprificace party is that it is high time for its lessiers to quit calling masses, and gred divan to business. If they suppose that it is in the power of massey, or party organization, or artfully pospected prejudices, to successfully oppose the effect of lanch as address on the mistal extraory. Mark Hanas, with all the millions he can command, and all the anscrupulous machine basses he holds in least, is not a master for a mas who can talk in the American people as Bryan does in this speech. His obvious electric, frankness and directness will break through and demolish any fortrass of materin politics or chleanery that can be creeted in its path. It will provar a woore effective repose than Resator Hoar's, because it has watened the season of materin politics are being it.

"Benator Hoar's proch may give the Demakliana Hath. To an academic dissertation, or, but us say, has despired it of soything but a Pickwickian seriousness. This speech of Mr. Bryan is another matter. Us is a man whose conviction is as implacable as was Garrison's, who can present his thought to the people with a plainages and persuasiveness that has hardly been equalled since Ahraham Lincola. The question for the managers of the thepublican party, by which he much be defeated, if he is to be befeated, in how to meet this aggressive mat therable, by the way, is an anti-

The Herald, by the way, is an anti-llyran paper and therefore its marked tribute to the power of Mr. Bryan's speech has the more nignificance.

"The fire entera nre dyling ont; but the blood drinkers are on the increase," anys n Now Orienne physician in Then Times-Bemoerni of that city. "Go down to the sisughter pens near the barracks any morning, and you'll see a crowd of them waiting for their duling draft fresh from the naimals' veins. Most of the drinkers are people who show plainly the ravages of tuberculosis, but others are merely run down and delilitated and take the blood as a tonic. There are always women and children in the gathering, and, while all classes of society are represented, it is one place at least where there are no cante distinctions. Their milictions and the curioas treatment they are taking give them a common meeting ground, ond it is singular to see how they fraternize. You will find wentity with hoboes and society women swapping aymptoms with womeo in ragged calice. It's a queer sight."

"A married woman ought to feel younger and happier after 50 than before."

"Yes. She has either got the upper hand of her husband by linat time or has gait trying to get it."—Indisnapalis Journal.

Other so-called talking machines reproduce only records of ent-and-dried subjects specially prepared in a laloratory. The Graphophone is not limited to such performances. On the Graphophone you can essilly make records of your own voice or music and reproduce them instantly and as often as desired.

The Graphophone has very aptly been called the prince of entertainers. With equal appropriateness it may be termed an entertainer of trinces. When that celebrated Celestial of the yellow jacket and, peacock feathers—Li lling Chang—made his famous tour around the world, he carried with him from America to Calina two of the handsoment Graphophone outflit then obtainable. "There are pleaty of republicans who will loyal to the party, and who will to the straight republican telect in Nomber, but who nevertheless feel some appointment that the pleage siready ade in the case of Cuba should not have see extended to Porto Ros and the hillippines. These republicans admit a necessity for establishing peace and a shie form of government in such of the ware figurish colonies, before giving it 1f-provenment. Yet they insist that at 18.—Pole, Riestric Station, private they are the plant that at 18.—Pole, Lackson Square.

stable form of government in such of the former Spanish colonies, before giving its self-government. Yet they insist that at least the policy of the party in regard to least the policy of the party in regard to those territories should be made as a piete as it has been made in the case of Cuba. It is not difficult to fail much republicans. Among their number are included some of the foremost party leaders, and they have a following of some size.

"The spathy of which fine. Hamma new makes complaint proceeds partly from the sentiment in that portion of the party as well as from any faciling of over-confidence."

This is a great country. Cartain republicans aftern that their's is the only patriotism and, as Rossevelt says, "Democrate of the Eryan-Hill persuasion claim that they only are the true particul and that the republicans are ruining the country with imperialism and trust. The prohibitionists hold that their's is the only true particul and that the republicans are ruining the country with imperialism and trust. The prohibitionists hold that their's is the only true particul. And now comes William Events of Quieng with a latter to the New York Fost is which he says that there is nothing in the field that he can vote for and there must be another mominating made there must be according to the field that he can vote for and there must be according to the field that he can vote for and there must be another mominating made there must be according to the field that he can vote for an there were the another mominating made there must be according to the field that he can vote for an through the particular made there must be according to the field that he can vote for an through the particular made there must be according to the field that he can vote for an through the particular made the as well as from any feeling of over-confidence."

This is a great country. Certain republicans aftern that theirs is the only patriotism and, as Research says, "Democrats are covaries showed and traitors at home." Democrats of the Erya-Hill persuasion claim that they only are the true patriots and that the republicans are raining the country with imperialism and irraits. The problibitionists held that their's is the only true patriotism, and so on through the list of ten or twelve parties. And now comes William Eventtheir's is the only true particular, and are on through the list of ten or twelve parties. And now comes William Eventtheir's is the only true to the New York. Fast is which he says that there is nothing in the field that he can vote for and there much he another confined made by the Hattiende at their convention list. Mr. Evenett ages; "Heither Bryan nor McKinley deserves the confidence of patriotic men," and all such should obtend this curvantion. If no candidates are nominated that patriotic men can vote for he bolleras is refused to vote and not "solling one's hande by grapping with any hefouled palam."

It is curious, is it not, how they all think they are the only true patriots.

Weymouth will have to try again, Restland in for shead of an and her a tex mas of \$80.30 and in still behind in many improvements; they can't even enderse the state laws in regard to vaccination and other easitary conditions.

Members of Hose 5 Kept Busy Showing Harnesses,

The set of Berry's Patent Swinging Harnesses which the Gasette offersible a gift to the fire company receiving the largest number of vites in its popular voting contest, and a representation of which is given above, was bung up in Hose 5 house at South Weymouth, yesterday. The harnesses arrived shortly before The small boy, always on the alert for something new, was not slow in learning of their arrival, and was equally first to making known his discovery, and in a short time a crowd of literated citizens had gathered to watch the work of hanging them. instead citization had gathered to watch the work of hinging them. Mr. Berry, the manufacturer of the harmasses, was ever-valuable with questions from young and old, and replied to them all in an accommodating manner. He carefully explained the mechanism and working of the contrivance and everybudy, was imperated with the great convenience, yet simplicity of the entire arrangement. So simple that a child could operate it." You many the clasp and the mechanism does the rest. The whole thing gives a tone and an up-to-date appearance such as is not found in most country fire stations. The librry harmen is unlike most awinging harmesses, in that the usual system of weights and pulleys required in their operation is entirely done away with. These particular harmesses were consensuals and every bather, clasp, ring, hook, etc., is richly mounted with alway, giving it is decidedly smort appearance. This bridles, of course are of the regular halter style, and when the horses are in the stable, and used as such, the bits hanging under the lower jaw and bring easily slipped into the salmel's mouth. Upon arriving at the engine house all that needs to be done is simply to awing your team into position under the harmanies, map the collers tegether.

A steamer was sailing for the Modiferranean at the end of the fourth day, and when she departed the judge was one of her passengers. There were more then a hundred others, and as the weather was also stormy for the first two or three days out no one commentated out the fact that the passenger who was registered as Major Davis sinck close to his cabin and hed his meals brought to him hy a stoward. Judge Date hed chenged his name, but he hed no idea of changing his identity. There were isughter and conversation and a clatter of diabea as all the passengers smally gathered for dinner for the first time since leaving Sandy Hook. To the right of the captain ast one of the landsomest ladies and one of the finest looking gentlemen ou the list, but taken altogether it was a grand array of wealth and culture. Dinner was fairly under way, and the lady on the captain's right was beaming, when she happened to cast her eyes down the table, and her face went as while as death in a second. Half a done people caught her words as she whispered in her supposed husband:

"My God, John, but there is the judge!"

"Whot is fit?" asked the capiain as "Mrs. Bemie" abuddered and gasped and seemed on the point of fainting.

"A—a madden illness—heart trouble?" she stammered as she isft the table for her stateroom, followed by her supposed husband.

There were wonder and curiosity, but little was said. "Good form" demonds that such incidents he passed over as casily as possible. There were those who thought it might be heart trouble and others who suspected the presence of the "major" hed something to do with it, but thet was no place to compare notes. The District appropriation act approved June 6, 1900, provided the sum of \$100,000 for the purchase by the commissioners of a suitable site for a riumicipal hospital. The commissioners advertised for proposals for such a site, specifying among other things that it should contain not less than five acres. In response they received proposals from 41 different process of land beings offered by one bidder. The tracts offered by one bidder. The tracts offered typessed every section of the District, and is more than one case land within the city limits was offered. No funds for the construction of the hospital being available until appropriated by congress, it is understood the commissioners will not acket the aits for several weeks.
